

Cognitive Therapy and Research—Volume 1, Number 4, 1977

Cognitive Therapy and Research is a broadly conceived interdisciplinary journal whose main function is to stimulate and communicate research and theory on the role of cognitive processes in human adaptation and adjustment. It attempts to integrate such diverse areas of psychology as clinical, counseling, experimental, cognitive, community, social, personality theory, self-regulation, physiology, biofeedback, philosophy, and the psychology of science. Articles considered for publication include the following: (1) Theoretical and Review Articles, (2) Experimental Studies, (3) Technical and Methodological Articles, (4) Case Studies, and (5) Brief Notes. The majority of publication space is devoted to experimental studies and brief notes.
